

```

<!DOCTYPE html>
<html>
<body>
<?php
    $servername = "localhost" ;
    $username   = "root" ;
    $password   = "praveen" ;
    $database   = "Project" ;
    // creat connection
    $conn = new mysqli( $servername , $username , $password , $database );
    // cheach connection
    if( !$conn ){
        die("Connection failed: " . $conn->connect_error);
    }
    $sql = " USE Project ; " ;
    mysqli_query( $conn , $sql ) ;
?>
</body>
</html>

```

1. please change, localhost name, password in "database.php"
2. please update database using "project hospital.txt"
3. run the project using [http://localhost/...../hospital/main\\_page.php](http://localhost/...../hospital/main_page.php) ,  
("main.php")
4. thair is some video in the recode folder, it implements few functions of our hospital management system.
5. Project webpages are at the 'hospital' folder.
